

## Aids Infections on the Rise \_\_\_\_\_

In 2000 the WHO *estimated* that 5.3 million people, the \_\_\_\_\_ includes 600,000 children younger than 15, got \_\_\_\_\_ with HIV, the \_\_\_\_\_ that causes Aids.

About 36.1 million adults and children are said to be living with Aids of HIV, the \_\_\_\_\_ is divided up equally between men and women.

In the last two decades 21.8 million people have been killed, including 3 million this year. The number of women is still on the \_\_\_\_\_ .

The \_\_\_\_\_ accounts for new victims all over the world, including the industrialized countries although there are \_\_\_\_\_ now that slow down the speed from the HIV infection to Aids and from there to death. This is the reason why the rate of \_\_\_\_\_ infections in industrial countries has stayed rather constant in the past few years.

Half a million infected persons live in Western Europe, which has about 30,000 new infections each year, whereas you have 15,000 infected persons in Australia and New Zealand and about 500 new infections per year.

\_\_\_\_\_ are responsible for nearly all of the new infections in Eastern Europe and Central Asia, these areas have the \_\_\_\_\_ increase in infections each year (about 250,000 people).
