

## How to make videos with your phone

### Structure:

- topic
- attention catcher (quote, cartoon, embedded clip...)
- examples and facts
- relevant information (reduce amount of information)
- keywords (text only if it is a quote):. you don't want the audience to read but you want them to listen to you
- conclusion
- sources + date of access

### Designing a video

- choose a background that suits the topic
- include visual elements (photos, statistics, cartoons, embedded clips) that have to be explained to the audience and help the audience to understand the topic
- make a storyboard (use the page: "How to make a storyboard")
- make sure that the phone is held steadily while filming
- you can either film yourselves presenting or like an explainity clip

Go to the following two links and add notes to this how to ... page:
